

Fort Gordon Range Control

UNIT: _____ **TRAINING AREAS:** _____ **CP GRID:** _____ **# OF PER** _____ **# OF Veh:** _____

TRAINING AREA CHECKLIST

1. Unit(s) occupying or utilizing any Training Area on Fort Gordon will comply with the following guidelines prior to occupation. It is the unit's responsibility to familiarize themselves with FG Reg 210-21 (Range Regulation).
2. The rank of E-7 (or above) is required to sign for Training Areas (TA's). Unit commanders are responsible to ensure their personnel are familiar with FG Reg. 210-21 and applicable safety regulations are followed. At no time will training areas be occupied without prior approval from Range Control (R/C).
3. Unit commanders will:
 - Provide protective clothing, equipment (i.e. wet bulb), supplies and facilities (other than medical) to prevent climatic injuries from occurring.
 - Implement heat and cold injury prevention programs within their respective commands.
 - Monitor environmental conditions where troops will be located with assistance provided by medical authorities AR 40-5 Chap 4.
4. Communication requirements will be met prior to occupying any training areas. Units are required to make two communication checks with Range Control while in training areas. Make communication checks with R/C once before 12:00 hours and once after 12:00 hours, with two hours minimum between the two checks. Units occupying training areas will have at a minimum the following:
 - a. Units must maintain and monitor FM communications, frequency 42.00 with Range Control. Units will have either a vehicular mounted or portable FM communications at all times.
 - b. A cell phone supplied by the unit may be used to make commo checks if the unit does not have FM communications.
5. Risk Assessment Cards must be filled out and on hand for each mission conducted during the FTX (i.e. occupy, night defense, road march, etc.).
6. Unit(s) will conduct only those activities approved by R/C and ENRMO. Unit(s) will train in their assigned training areas only. This includes refueling operations, squad maneuver, etc.
7. Upon occupation of a training area, unit assumes full responsibility for the training site. This includes field police, wire, concertina wire, unfilled foxholes/fighting positions, and refuse/garbage left by a prior unit. All deficiencies must be reported to Range Controls within two (2) hours of occupation.

8. Report all HAZMAT/UXO to Range Control immediately. Mark and secure area IAW FG-Reg. 210-21. HAZMAT/UXO will not be handled by anyone, except qualified EOD personnel.
9. Unit must notify R/C and be granted permission on a daily basis prior to utilizing any pyrotechnics (i.e. smoke, grenade simulators, star clusters).
10. All food plots, pine seedling areas, and designated endangered species areas are off-limits to military maneuvers. Units occupying these areas will be required to relocate immediately regardless of unit size, equipment, or mission. Contact Range Control prior to occupation is essential.
11. Digging of fighting positions or trenches must have prior approved by Range Control and ENRMO and be annotated on your Environmental Checklist submitted by the unit. All fighting position/trenches will be filled in and leveled prior to clearing the TA.
12. All POL spills will be reported to Range Control immediately. Failure to report a spill will result in the unit being removed from the training site. Commanders will be held accountable for POL spills, clean up and removal of contaminated soil IAW Fort Gordon Hazardous Material. If Range Control is closed notify the MP desk. For spills greater than twenty-five gallons, or if the spill reaches a water source notify the installation spill team at 911 immediately.
13. Commanders are responsible for all safety briefings prior to the conduct of any tactical mission (i.e. Convoys, refueling operations, site occupation, etc.).
14. No roads leading into a training area will be blocked with logs, brush, and concertina wire or any other means of blocking roads, unless manned 24hrs a day. Concertina will be marked with white engineer tape and made highly visible. All field wire and concertina must be recovered at the conclusion of the FTX(s).
15. Port-O-Lets must be free of trash and swept prior to training area cleared by Range Control.
16. All stoves and heaters must at a minimum have one 10-lb. fire extinguisher rated for B/C fires within close proximity for emergency situations.
17. Conduct a thorough police call of each training area occupied prior to contacting Range Control for clearance.
18. Units planning to depart on the weekend/holiday must contact Range Control to make prior coordination for clearing. Units departing training areas not properly cleared will be notified and required to send a detail to properly clear their training areas.
19. POV's are not authorized in training areas without prior approval by Range Control. All vehicles authorized parking in a training area will be issued a permit by Range Control.

NOTE: If you do not clear your training area with Range Control your unit will not be allowed to sign for another training area until cleared by the OIC of Range Control.
